Forward Looking Statements

Use of Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward looking statements include information, among other things, concerning: our possible or assumed future results of operations; future demands for solar energy solutions; business strategies; technology developments; financing and investment plans; dividend policy; competitive position; industry and regulatory environment; general economic conditions; potential growth opportunities; and the effects of competition.

Forward-looking statements are only predictions based on our current expectations and are inherently subject to risks and uncertainties. They should not be considered guarantees of future results, which could differ materially from the results set forth in, contemplated by, or underlying this presentation.

Factors that could cause actual results to differ materially from our expectations are described in the reports filed by SolarEdge with the Securities and Exchange Commission and we encourage you to review our filings carefully, especially the sections entitled "Risk Factors" in our annual report Form.

SolarEdge undertakes no duty or obligation to update any forward-looking statements contained in this presentation as a result of new information, future events or changes in its expectations.

Innovative Architecture

Traditional String Inverters

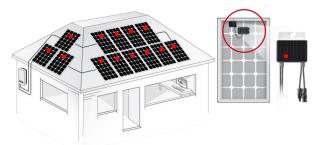

- One central inverter
- No module-level optimization
- No module-level intelligence
- × Energy loss
- × Limited roof utilization
- × No module-level monitoring
- × Safety hazards

Microinverters

- One inverter per module
- Module-level optimization
- Limited scalability
- × Cost and scalability
- × Questionable reliability
- Monitoring requires additional hardware

DC Optimized Inverter System

- Simplified central inverter
- Module-level optimization
- Improved scalability

Innovative Solution

Safe DC

Technology Roadmap

One Inverter for All Applications

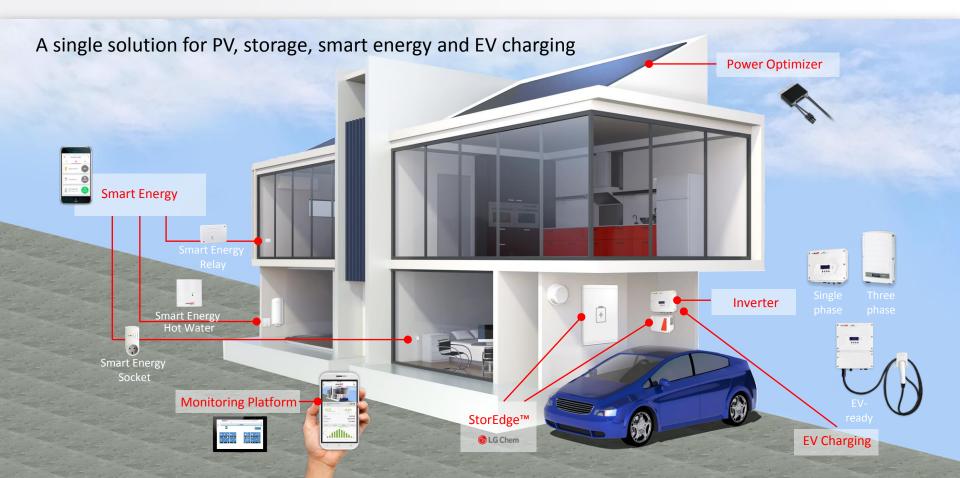

- The SolarEdge StorEdge inverter combines energy management of all features into one inverter
 - Simple design
 - Fast installation
 - Centralized energy management
 - Designed to work together; seamless and synchronized
 - Monitoring platform displays production, consumption, self-consumption & battery status on a single dashboard

One inverter replaces multiple separate management devices
